

ESM Technical data

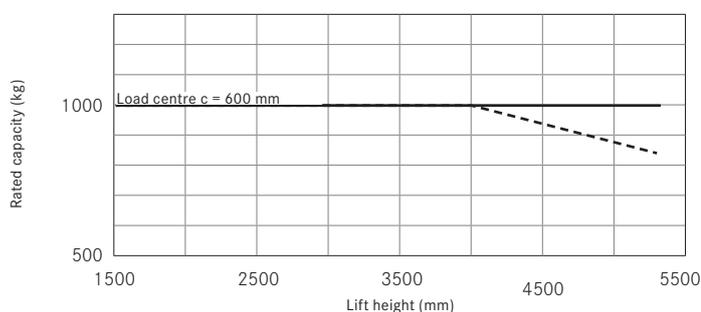

Electric stand-on forklift truck

This specification sheet to VDI Guidelines 2198 only gives the technical figures for the standard truck.
Different tyres, other masts, additional equipment etc. could give different figures.

ESM – the agile all-round talent.

The ESM electric stand-on forklift truck is an all-round talent for every internal transport job and stacking application. The ESM is especially well suited for narrow aisles and for transport jobs with frequent changes of the travel direction. With a load centre of 600 mm the ESM easily lifts 1000 kg loads up to a height of 5300 mm. The perfect harmony of safety, performance, comfort, compactness, dependability and service friendliness make it the ideal helper in the warehouse, for example to supply production lines, to transport goods in narrow aisles, in block storage or to load and unload lorries.

Special characteristics:

- Ergonomically designed workspace for the operator with many storage compartments.
- Progressive, digital control system for driving and lifting movements.
- Very compact chassis with rounded edges.
- Mast, chassis and overhead guard are connected to form a structural element for maximum mechanical stability.
- The controls can be parameterised according to individual customer wishes.
- Sensitive lift control with proportional valve.
- Single-piece cover for easy access to all components facilitating service and maintenance.
- Drive stand arranged sideways for best panoramic visibility.
- No straddle arms to facilitate stacking and destacking of goods and to transport closed load carriers.
- ± 92 degree steering angle for extreme agility.

Standard equipment:

- 2.2 kW drive motor.
- 3.0 kW lift motor.
- Intuitive joystick control.
- Hydrostatic power steering.
- Battery change over the side.
- Combination of electric brake (rear), mechanical brake (front) and automatic parking brake.
- Adjustable working position for the driver.
- Free-view mast for lift heights up to 5300 mm.
- Overhead guard with large windows.
- Hydraulic height-adjustment of the stand-on platform.
- Fork length: 1150 mm.

Special equipment:

- Different mast types for lift heights up to 1600 mm, 3520 mm or 5253 mm.
- High performance battery with up to 465 Ah.
- On-board charger.
- Container and cold store version.
- Low closed mast height.
- Side shift.
- Additional hydraulic functions.
- Tilting fork carriage.
- Driver restraint system.
- Load rest.
- Position indicator for drive wheel.
