* incl. Push bar

Pallet trolley
with corner guards

Pallet trolley
with push bar

Options:

- Polyamide wheels with Polyurethane face for smooth and silent rolling.
- 1 ESD wheel (anti-static).
- Ball bearings, double.
- Push bar.
- Corner guards for pallet trolleys.
- Load guard for push bar trolley, table trolley and rack trolley.

Plastic trolleys.

The innovative plastic trolleys from STILL make your logistics processes even more ergonomic and efficient. Light weight, flexible use, tray areas at comfortable heights and smooth rolling characteristics make the trolleys indispensable assistants.

Versatile.

- The well designed modular concept suits a broad range of applications. The range of trolleys including flat pallet trolleys, trolleys with push bars, table trolley or rack trolleys allows handling many different tasks in production, warehouse or workshop. The STILL plastic trolleys are a perfect match with the STILL tugger train.

Easy handling.

- These lightweight trolleys with smooth running polyamide wheels make any load handling easy and comfortable. The optional push bar supports an ergonomic body posture of the operator when pushing or pulling a load. Storage trays at a comfortable working height avoid strain of the back and provide large transport capacities.

Sturdy workmanship.

- The impact and weather resistant plastic floors are easy to keep clean and make the STILL plastic trolley a resilient all-rounder for indoor and outdoor use. The combination of a corrosion free aluminium frame and the foam filled plastic floor of the trolley allow to carry heavy loads providing a load capacity of up to 1000 kgs with the basic element of this modular system.

Load securing.

- Each plastic trolley is fitted with an edge to secure the load. In addition, optional load guards prevent parts of the load from dropping. For the pallet trolley four corner guards are available to hold the load in place. Two diagonally located parking brakes prevent the trolley from rolling off unintended.
